PROFESSIONAL SUMMARY

Business analytics graduate with experience building Power BI dashboards, SQL reports, automated data-preparation workflows, and predictive analyses. Skilled at translating operational data and stakeholder requirements into clear reporting and practical recommendations.

EDUCATION

University of New Hampshire Sep 2026
Master of Science, *Business Analytics* GPA: 3.91

Rhodes University Jan 2018
Bachelor of Science, *Information Systems and Mathematical Statistics*

SKILLS

TECHNICAL SKILLS: Analytics and Reporting: SQL, Power BI, Tableau, Excel, Power Query, Key Performance Indicators (KPIs), data cleaning, data validation, Programming and Methods: Python, R, regression, classification, machine learning, time-series analysis, natural language processing, Cloud and Delivery: Amazon Web Services (AWS), Amazon Aurora, relational data modeling, requirements gathering, Jira, project documentation

WORK EXPERIENCE

P2B Projects | Junior Data Analyst Oct 2024 - Jun 2025

- Prepared recurring operational and project-performance reports using Excel, Power Query, and Power BI, consolidating source data into dashboards for management review.
- Wrote SQL queries and performed data-quality checks to reconcile records, identify exceptions, and improve the reliability of reporting outputs.
- Worked with project stakeholders to clarify reporting needs, document issues in Jira, and translate findings into follow-up actions.

Self-Employed | Independent Consultant Nov 2019 - Present

- Gathered and documented client requirements for websites, web applications, and digital-media projects, translating business needs into defined deliverables and project plans.
- Coordinated engagements from discovery and pricing through design, development, testing, launch, and client handoff, serving as the primary contact throughout delivery.
- Reviewed client goals, audience needs, project costs, inquiries, and referral patterns to guide website features, content priorities, pricing, and service packages.

PROJECTS

Airbnb Booking Prediction and Investment Analysis

- Developed a classification and causal-analysis workflow for U.S. and Paris Airbnb data, engineering features and translating model findings into property-acquisition recommendations.

Diabetes Risk Classification

- Built and compared classification models using CDC survey records, selecting a decision threshold that prioritized identifying at-risk patients while explaining the false-positive tradeoff.

Content Strategy Analytics

- Analyzed large-scale customer-review data to identify recurring themes and translate findings into content and customer-experience recommendations.

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Generative AI with AWS: Amazon Bedrock - University of New Hampshire Oct 2025
